Welcome to the second issue of the year 2018, Women Online Journal of Distance Education, intWOJDE's. (Volume 7 Issue 2).

First of all, as the intWOJDE team we greet you all with our best wishes.

Distance education is very important in the education of women since they have lots of problems as women who cannot get enough education by being women only and because of above mentioned limitations such as distance, time and space. Because of the lack of education in the world and in our country, women, who cannot find formal education opportunities, prefer distance education to improve themselves and complete their remaining education.
